

Day02 Assignment : With vibe coding implement the below

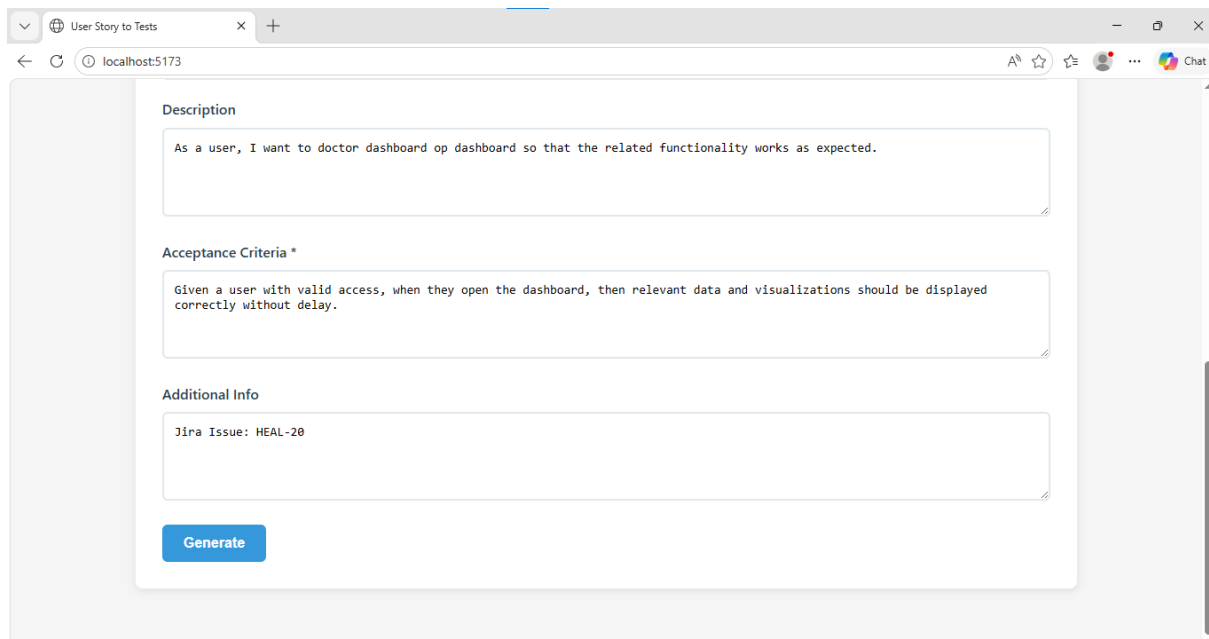

1)Connect to jira via api

2)Fetch the user storie from jira to generate testcases

JIRA Connection established successfully and the user stories under a project is fetched as well

The screenshot shows a web browser window with the title 'User Story to Tests' and the URL 'localhost:5173'. The page has a header 'Generate comprehensive test cases from your user stories'. The main content area is titled 'Jira Integration' and contains two dropdown menus. The first dropdown, 'Select Project', has 'HealthCare (HEAL)' selected. The second dropdown, 'Select User Story', has 'HEAL-20: Doctor Dashboard Op Dashboard' selected. Below these are two text input fields: 'Story Title *' with the value 'Doctor Dashboard Op Dashboard' and 'Description' with the value 'As a user, I want to doctor dashboard op dashboard so that the related functionality works as expected.'

The screenshot shows the same web browser window, but the 'Jira Integration' section is now expanded. It contains three text input fields: 'Description' with the value 'As a user, I want to doctor dashboard op dashboard so that the related functionality works as expected.', 'Acceptance Criteria *' with the value 'Given a user with valid access, when they open the dashboard, then relevant data and visualizations should be displayed correctly without delay.', and 'Additional Info' with the value 'Jira Issue: HEAL-20'. At the bottom of the form is a blue 'Generate' button.

Fetches Projects as Dropdown Values:

User Story to Tests
Generate comprehensive test cases from your user stories

Jira Integration

Select Project

HealthCare (HEAL)

Choose a project

- HealthCare (HEAL)
- My Scrum Project (SCRUM)
- HEALTHCARE Doctor Dashboard Op Dashboard

Story Title *

Doctor Dashboard Op Dashboard

Fetches available User Stories as Dropdown values:

HealthCare (HEAL)

Select User Story

HEAL-20: Doctor Dashboard Op Dashboard

Choose a user story

- HEAL-24: AHC Reports Reports AHC
- HEAL-18: Consultant Dashboard My Appointments
- HEAL-25: Employee Profile Employee Self
- HEAL-14: Doctor Activities Doctor Note
- HEAL-9: Radiology Transactions Front Office
- HEAL-5: Billing Execution Deposit Refund
- HEAL-16: Radiology Transactions Reporting Worklist
- HEAL-8: Radiology Transactions Technicians Worklist
- HEAL-3: Daycare Nurse Activities Raise
- HEAL-20: Doctor Dashboard Op Dashboard
- HEAL-10: Consultant Dashboard View Request
- HEAL-1: Consultant Dashboard My Inpatients
- HEAL-19: Reports Admin Reports Others
- HEAL-22: Masters Others Approval Setup
- HEAL-6: Nurse Activities Raise Request
- HEAL-17: Billing Execution Op Bill
- HEAL-23: Secretary Dashboard Doctor Calendar
- HEAL-15: Reports Bb Report Home
- HEAL-4: Reports View Reports Others

Test Case Generated for the selected User story:

Generated Test Cases

20 test case(s) generated • Model: meta-llama/llama-4-scout-17b-16e-instruct • Tokens: 2963

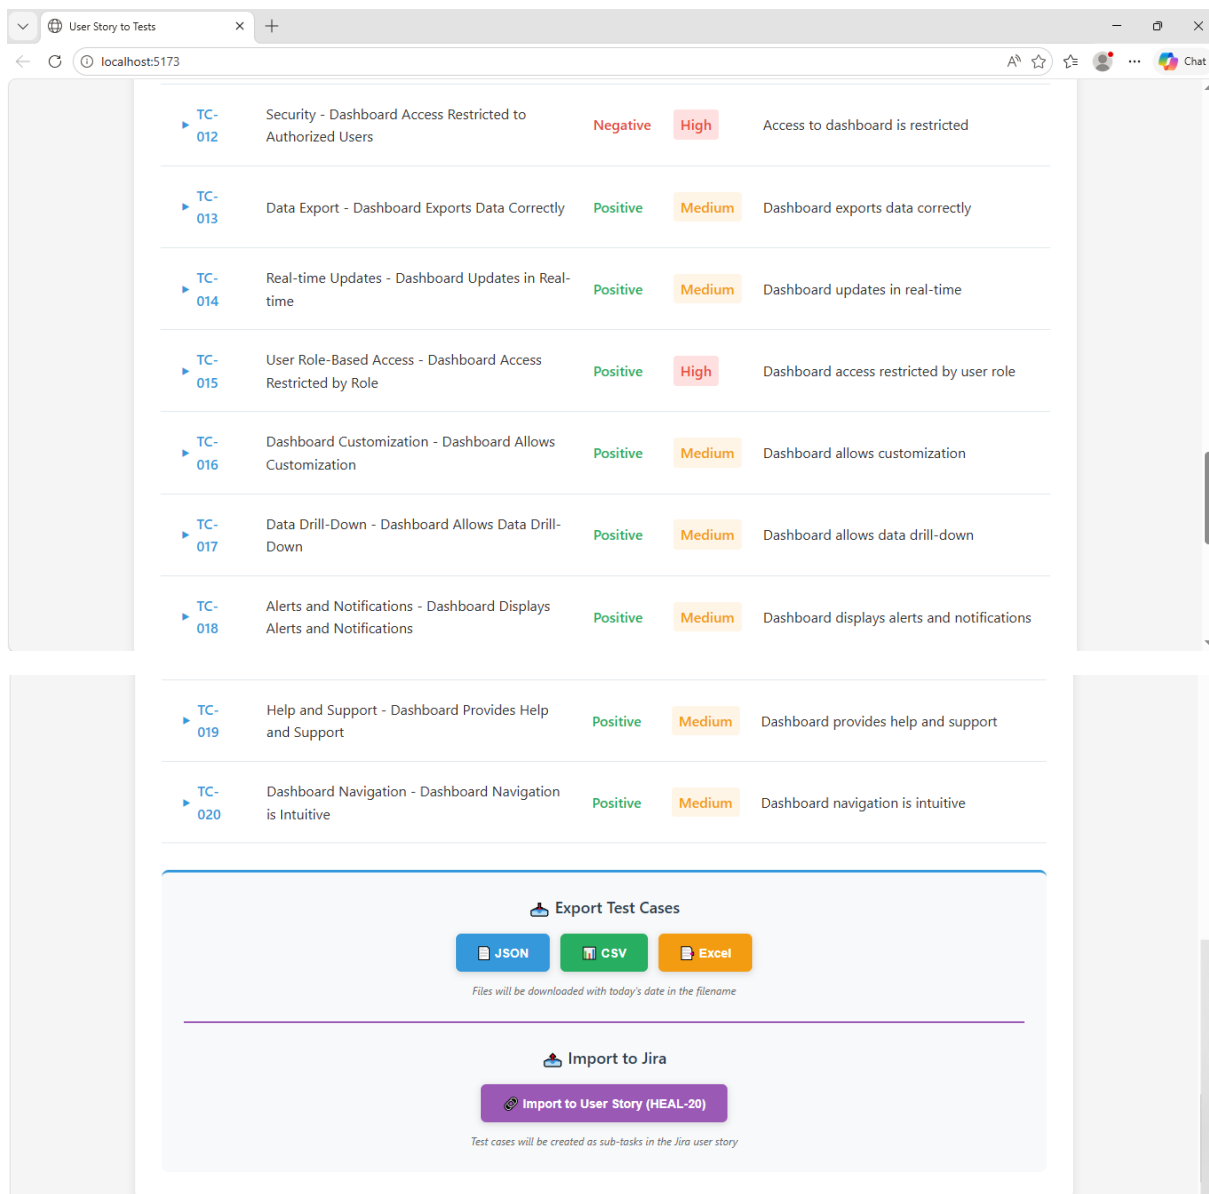

Test Case ID	Title	Category	Priority	Expected Result
TC-001	Valid User Access - Dashboard Loads Correctly	Positive	High	Dashboard loads correctly with relevant data and visualizations
TC-002	Invalid User Access - Dashboard Access Denied	Negative	High	Access to dashboard is denied
TC-003	No Data - Dashboard Displays Empty State	Edge	Medium	Dashboard displays empty state with no data
TC-004	Delayed Loading - Dashboard Loads Within Acceptable Time	Positive	Medium	Dashboard loads within acceptable time (e.g., < 5 seconds)

User Story to Tests

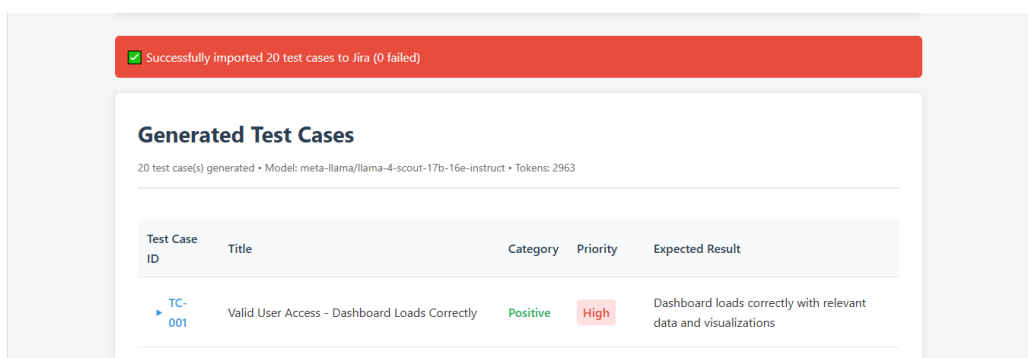

localhost:5173

Chat

TC-005	Visualization Error - Dashboard Displays Error Message	Negative	High	Dashboard displays error message for visualization
TC-006	Multiple User Sessions - Dashboard Updates Correctly	Positive	Medium	Dashboard updates correctly across multiple user sessions
TC-007	Browser Compatibility - Dashboard Works Across Browsers	Positive	Medium	Dashboard works correctly across different browsers
TC-008	Mobile Responsiveness - Dashboard Adapts to Mobile	Positive	Medium	Dashboard adapts correctly to mobile screen
TC-009	Data Filtering - Dashboard Filters Data Correctly	Positive	Medium	Dashboard displays filtered data correctly
TC-010	Data Sorting - Dashboard Sorts Data Correctly	Positive	Medium	Dashboard displays sorted data correctly
TC-011	Error Handling - Dashboard Displays Error Message	Negative	High	Dashboard displays error message

Along with test case generation I have also implemented uploading the test cases back into the JIRA for that user story. See above screenshot containing import to JIRA option.

JIRA user story mapped with the generated test cases:

The screenshot displays a Jira issue page for the user story "Doctor Dashboard Op Dashboard". The issue is in the "In Progress" state and is assigned to Raghunath. The description states: "As a user, I want to doctor dashboard op dashboard so that the related functionality works as expected." The acceptance criteria are: "Given a user with valid access, when they open the dashboard, then relevant data and visualizations should be displayed correctly without delay." The issue is mapped to 13 test cases, all of which are currently in the "TO DO" state.

Key details

Description

As a user, I want to doctor dashboard op dashboard so that the related functionality works as expected.

acceptanceCriteria

Given a user with valid access, when they open the dashboard, then relevant data and visualizations should be displayed correctly without delay.

Subtasks

0% Done

Work	Priority	Story Points	Assignee	Status
HEAL-26 Valid User Access - Dashboard Loads Correctly	Medium		Unassi	TO DO
HEAL-27 Invalid User Access - Dashboard Access Denied	Medium		Unassi	TO DO
HEAL-28 No Data - Dashboard Displays Empty State	Medium		Unassi	TO DO
HEAL-29 Delayed Loading - Dashboard Loads Within Acceptable Time	Medium		Unassi	TO DO
HEAL-30 Visualization Error - Dashboard Displays Error Message	Medium		Unassi	TO DO
HEAL-31 Multiple User Sessions - Dashboard Updates Correctly	Medium		Unassi	TO DO
HEAL-32 Browser Compatibility - Dashboard Works Across...	Medium		Unassi	TO DO
HEAL-33 Mobile Responsiveness - Dashboard Adapts to Mobile	Medium		Unassi	TO DO
HEAL-34 Data Filtering - Dashboard Filters Data Correctly	Medium		Unassi	TO DO
HEAL-35 Data Sorting - Dashboard Sorts Data Correctly	Medium		Unassi	TO DO
HEAL-36 Error Handling - Dashboard Displays Error Message	Medium		Unassi	TO DO
HEAL-37 Security - Dashboard Access Restricted to Authorized Users	Medium		Unassi	TO DO
HEAL-38 Data Export - Dashboard Exports Data Correctly	Medium		Unassi	TO DO
HEAL-39 Real-time Updates - Dashboard Updates in Real-time	Medium		Unassi	TO DO
