```
Instructions: Do not use ID if the value has number in it. Provide only\njava code and no explanations needed\". So we need to locate elements\nwithout using ID if ID contains number. The IDs:\ncreateLeadForm_companyName (no number), createLeadForm_lastName (no\nnumber), createLeadForm_firstName (no number), ext-gen630 (has number).\nSo we can use ID for first three, but not for the submit button. For the\nsubmit button, we need alternative locator, maybe by class and value.\nProvide Java code that finds these elements and maybe extracts values?\n\"Extract the below given DOM\" maybe means get the elements. Provide\ncode that uses WebDriver to locate them. Provide only Java code, no\nexplanations.\n\nThus output something like:\n\nWebElement companyName =\ndriver.findElement(By.id(\"createLeadForm_companyName\"));\nWebElement\nlastName = driver.findElement(By.id(\"createLeadForm_lastName\"));\nWebElement firstName = driver.findElement(By.id\n(\"createLeadForm_firstName\"));\nWebElement createLeadBtn = driver.\nfindElement(By.xpath(\"//input[@type='submit' and @class='smallSubmit'\nand @value='Create Lead']\");\n\nMaybe also get attributes? But likely\njust locate.\n\nWill include imports and class skeleton? Probably just\ncode snippet. Provide only java code.\n\nLet's produce."

Prompt without asking to remove new line references.

The screenshot shows a REST client interface with a POST request to `https://api.groq.com/openai/v1/chat/completions`. The request body is in JSON format, containing a model name and a list of messages. The first message is a user prompt asking to extract text from an image while maintaining case sensitivity. The second message is an image URL.

```
1 {
2   "model": "meta-llama/llama-4-scout-17b-16e-instruct",
3   "messages": [
4     {
5       "role": "user",
6       "content": [
7         {
8           "type": "text",
9           "text": "This is a image. Extract and return only the exact text and maintain the
10            case sensitivity."
11         },
12         {
13           "type": "image_url",
14           "image_url": {
15             "url": "https://images.pexels.com/photos/7248168/pexels-photo-7248168.jpeg"
16           }
17         }
18       ]
19     }
20   ]
21 }
```

Output:

The screenshot shows the JSON response from the API. The response includes a unique ID, the object type 'chat.completion', a timestamp, the model name, and a list of choices. The first choice is an assistant message that repeats the text from the image URL in all caps, with new line characters inserted. The response also includes log probabilities and a finish reason of 'stop'.

    "content": "## Bengaluru Weather Today,
February 26th\n\nAs of this morning, Bengaluru's temperature today stands at around
21°C, with humidity levels at 83% in the early hours. The city is covered with
clear skies, and the day is expected to remain partly sunny, with the maximum
temperature expected to be around 32°C.\n\nAs per data from Ease Weather, Bangalore
weather in February began with average highs of 30.1°C, gradually rising to nearly
31.7°C toward the end. So far, February 2026 has been slightly cooler than
historical averages by about -1.1°C, but temperatures in the coming days are
forecast to spike to 34.1°C toward warmer-than-usual conditions. [...]
GoodReturns\nGoodReturns\n\npreference\n\nBengaluru weather update: The city is on
the brink of a scorching summer, with the India Meteorological Department
predicting above-normal temperatures and possible heatwave conditions from March
2026. While no active heatwave alert has been issued for Karnataka weather today,
February 26, IMD has warned that the coming months could bring harsher-than-usual
conditions across Bengaluru and several other districts.\n\nBengaluru
Weather\n\nAccording to IMD projections, summer in Bengaluru will officially begin
on March 1, with temperatures expected to jump during April and May.\n\n##
Bengaluru Weather Today, February 26th [...] Historically, Bengaluru weather has
recorded extreme summer peaks. The city touched 39.2°C in April 2016, while May's
all-time record stands at 38.9°C (1931). IMD data suggests that the city could once
again approach the 39°C mark in the coming months.\n\n## Heatwave Risk In Karnataka
From March To May\n\nWhile no heatwave alert in Karnataka has been announced as of
now, IMD forecasts say that there is a high probability of above-normal maximum
temperatures statewide. Coastal regions have a 65-75% probability of temperature
spikes, while northern interior Karnataka may face the highest risk of severe
heatwaves during peak summer.",
